

A WORD OF GRATITUDE FOR MY LEADER.

Its said that six months in a life time is nothing, but for me it was a lifetime in last six months. That's how valuable this fellowship has been. It started on a high note on first day of the new year with Dr.SR sir's speech, quoting time magazine cover 'The Genius Issue' and visioning next five years. I was upbeat.

But after meeting you and hearing your talk on 'Leadership in Anaesthesia', it had a deep impact on me. I still do remember that you conceived that idea in car on the roadside. You said every cell of your body should be in it. Every word that you have said had an impact.

The aura that you exhibit, the energy that you liberate is phenomenal. I have never seen a man working with the same zeal and intensity, the same smile from early morning till late night that to tirelessly and everyday. The passion for the work, the love for anaesthesia along with family values and valuing them. The patient care, conduct in front of them, treating with compassion these are just a few of the million things to mention to have learnt from you.

To mention your quote, 'Crusade against mediocrity', 'Be the MS Dhoni of your field' amongst many is so inspiring. Its not just a fellowship, it's a seed that you sow in each one of us. Its not just regional but global. Its not just about anaesthesia but lifetime wisdom.

There are times in everyones life when they look back and say, this event changed their life. For me when I will look down the memory lane to the event that changed my life its this fellowship, its in being your student, its being the part of the GANGA family.

To quote a incident amongst many that really makes one marvel at you is WFSA fellowship. We really didn't have even slightest of idea that it had a potential to change an entire nation, that's completely unimaginable but you made it work. And that's coming from my own experience in last six months the kind of impact that you're having throughout the world.

About conference Dr. Marudachalam described it as a wedding, it sure might be like that but without the house going out of order or going in chaos that was hosting it. That's when I realized what one man army feels. The thought that you perceived to make it into

reality in a better way than we were described needs a bow. Truly worldclass, out of the box, holistic conference. Its set a standard at all levels.

There are only a handful chosen people who have the power to touch the lives of people, who can make the lives of others better and you are one of them. The one who always thinks for the betterment of society. Always puts society before self, commitment before pleasure, nation above all. A leader in true sense, that's guiding us out of mediocrity, visioning to put india on global map. Under your leadership the time has come when the west will start looking east.

And I inturn promise you sir to serve the society, be a better human, have compassion and be the best. As law of karma goes it must have been my good karmas that I am here. Its been a mesmerizing, phenomenal, outstanding, (whatever verbs I use would not fit in to describe my experience) journey in last six months. To be your student is an honour and I will for lifetime be your student. Grateful and happy that you chose me for this fellowship and in mentoring us throughout.

TO BRING A CHANGE IN PEOPLES LIFE,
TO FACE A CHALLENGE WITH A SMILE.
STRIVING HARD WITH EVERY MILE,
AIMING BEST ALL THE WHILE.
TO BE THE ONE PEOPLE LOOK UP TO,
TO WALK THE TALK AND SMILING IMPROMPTU.
EVERLASTING ENTHUSIASM, FILLED WITH PASSION,
SPREADING SMILES, SERVING WITH COMPASSION.
BREAKING THE SHACKLES OF CONSERVATIVE THINKING,
WRITING THE PATH WITH NEW INKLING.
OUT OF THE BOX EVERYTHING HE HAS DONE AND DESCRIBED,
TO WAKE THE WORLD A LEADER HAS ARRIVED.

Your grateful student,
Dr. Hitesh Nathani.
